## Connected Monitoring

Dryer fires are a real problem and happen every day, accounting for millions of dollars in property damage and claiming dozens of lives every year. As lint accumulates over time, pressure levels increase. This results in long, costly cycle times that become dangerous.

Your connected LintAlert with Wi-Fi technology empowers you to proactively manage dryer venting safety and efficiency. The LintAlert PRO Plus is the only home safety solution that helps prevent dryer fires by providing real-time monitoring metrics right in the palm of your hand.

## U.S. Dryer Fire Statistics

14,000+ Dryer Fires Reported Every Year  
\$191 Million Annual Property Damage  
30 Civilian Lives Lost Each Year

## Quantifiable Safety

The LintAlert mobile app delivers real-time, detailed information on your dryer's efficiency. You'll always know your dryer is operating as safely as possible.

- Alerts When the Dryer Cycle is Complete
- Calculates Average and Maximum Cycle Times
- Identifies Average Number of Cycles Per Week
- Shows Time Since Last Vent Cleaning
- Estimates the Cost to Run the Dryer
- Displays Actual Blockage Percentage
- Alarms when Blockage Becomes Dangerous

Worried that you left the dryer running while away?  
Save a trip home by checking it on your phone.

Getting connected is as simple as 1-2-3.

- (1) Calibrate the LintAlert when the exhaust system is clean or in a like-new state (Less than 5 Minutes).
- (2) Load the LintAlert app and pair it with your phone.
- (3) Start monitoring venting information.

Your LintAlert app highlights digital readings and graphs with customizable dashboards and monitoring preference options that empower you to maintain a safe and efficient dryer exhaust system.

## Details in the Mobile App

Wi-Fi connectivity and a user-friendly interface gives you the ability to record critical information and provides key insights on dryer performance. Some specific details you can monitor within the app:

Ducting Details	
Actual Duct Length	Floor of Dryer Location
Number of Elbows	Floor of Dryer Termination
Exterior Termination Point	Booster Fan Information
Back Pressure Readings (wci)	Dryer Design (Side by Side vs. Stackable)
Airflow Velocity Readings (fpm)	Dryer Accessibility (Easy vs. Hard)

Appliance Details	
Appliance Manufacturer	Dryer Image
Appliance Model	Serial Number Image
Appliance Year	Before Job Setup
Appliance Power Source	After Job Completion 1
Serial Number	After Job Completion 2

## Simple, Intuitive Dryer Safety Alarm

Not only does PRO Plus equipment provide quantifiable metrics on the dryer vent's performance, the LintAlert's functionality has drastically improved with a sure fire installation in virtually every home.

- ✓ **Diagnostic Pressure Check** — Use the LintAlert to help identify actual back pressure levels that exist in the duct both *before* and *after* the cleaning.
- ✓ **Calibrates with any Dryer Duct Run** — The PRO Plus calibrates to the shortest runs and very long runs (50'+) in just six seconds.
- ✓ **Works with Variable Venting** — Booster fan activation and lightly iced vents are handled through a 90-second delay feature. This helps eliminate unnecessary alarms.
- ✓ **LEDs Provide Clear Information** — Understanding indicator meanings is simple. PRO Plus only displays the logo light and LEDs in unique, independent sequences. At any point, it's easy to identify exactly what the system is doing.
- ✓ **Support for Proactive Monitoring** — Customizable rules help to better maintain a safe and efficient dryer vent based on your usage patterns.

## Overall, the Benefits for Your Home are Clear and Considerable:

The LintAlert PRO Plus with Wi-Fi harnesses today's technological advancements delivering valuable information related to your dryer's venting performance and efficiency. With customizable filters, real-time data and automated alerts, you can proactively monitor the vent system and take action when needed. Lint accumulation and various duct blockages were once considered a hidden danger. Now the LintAlert PRO Plus with Wi-Fi allows you to see behind walls—within the duct run—to maximize home safety and efficiency. Get connected with your LintAlert PRO Plus today.
